NOVEMBER INTELLIGENCE REPORT - FROM THE NATIONAL DEFENSE COORDINATOR:

Many of you have observed trains loaded with military equipment. If these trains are headed south or west, they may be headed to the border between Mexico and the U.S. It seems that finally the military is beginning to realize the danger from the south.

The large Soviet tank force, which was located about 200 miles south of the border, has been dispersed, and at this time we do not know its location. We have reports that it has tactical nuclear weapons in its arsenal.

In late October a firefight was reported near Lake Arivaca, Arizona, between a large group of aliens and U.S. Border Patrolmen. (This is between Nogales and Tuscon, about five miles west of I-19.) This included automatic weapons and some heavier stuff. You didn't read about this in your newspapers or see it on the TV news. Only limited National Guard participation is expected along the border; they seem to be held back for other uses. We can only guess what these might be, but many of them have been training in riot control, in large scale riot conditions.

Many illegals have been apprehended in the El Paso, Laredo, and Brownsville areas of Texas this past summer. Many of them are armed with M-16 automatic rifles, whose serial numbers match those lost or left behind in Vietnam. There have also been numbers of Russian AK-47's, with as much as 1,000 rounds of ammunition per gun; grenades; yellow florescent armbands with red stars or hammer and sickle displayed; false passports; "green cards;" and other forms of identification.

Many of these men have maps of the Dallas-Fort Worth; Kansas City; Chicago; Topeka; Omaha; St. Louis; Jackson, Miss.; New Orleans; San Antonio, and other major mid-western cities. These have major objectives marked and routes of access into the cities.

A Federal Judge in Texas has ordered their release from custody, with all weapons except those which came from Vietnam. Evidence points to heavy Congressional pressure from two Massachusetts and one Texas Congressmen to affect their release.

Some of you have read about the 20 Russian Backfire bombers which were intercepted recently by Japanese fighters, just minutes before they entered Japanese airspace. Obviously they were testing Japanese reaction time. They were traveling at less than 50% of their maximum rated speed of Mach 2.3. Had they been on a combat mission, Japanese cities would have been under mushroom clouds before their fighters could have been scrambled. The Soviets have also done this in NATO and our own Bering Sea area. They could be gathering information for a coming attack.

Peace activists have been sabotaging NATO military bases in Europe. They have been especially active in the "Fulder Gap." This is a line about 75 miles long, stretching from the city of Kassel to Bamberg, with Frankfort in the center. Terrain in this area is perfect for a tank attack and the use of Armored Personnel Carriers (APC). It would be very difficult to defend. Activists arrested in this area have been 65% members of the Communist Party and 15% of the "Green Party," with about 80% of them obviously Jewish.

In the U.S. a large cache of firearms was recently discovered in an abandoned house in the Benson/Dundee area of Omaha. It consisted of 105 M-16 fully automatic rifles; 60 Mini-14's; 6 M-60 MGS; 2 M-2 .50 cal MGS; 12 Steiger SSG Sniper rifles with scopes and over 100,000 rounds of assorted ammunition in sizes (.223, .308, 50 cal, .45 and 9 mm). In addition, there were 75 handguns (.45 and 9mm); 6 cases of hand grenades, and 2 cases of Claymore mines. Everything with the exception of the 9mm and Mini-14's was stolen from a National Guard Armory in 1978.

The owner of the house was a liberal pro-Zionist, pro-Communist associate professor at UNO, Orville Menard. He was taken into custody and immediately released on his own recognizance, and has since disappeared.

Several maps were discovered in this cache, which, according to a source in the Omaha Police Intelligence Division, showed location of all utility sources and police, fire and communications centers. These maps were also marked with entry routes and what looked like primary and secondary attack objectives.

Canfields, an Omaha military surplus store, owned by Richard Canfield, a Jew, has donated an estimated \$50,000 worth of equipment, food, and supplies to the local branch of the Jewish Defense League (JDL).

Leaders of radical elements, including Jews and Blacks, have toned down their rhetoric, while the Peace Groups seem to be growing bolder.

It is interesting to me to see how Jewish sources are pushing a massive propaganda effort to convince white Christians in particular that the Jews were the "root of western civilization." In addition, they are pushing the National Education Association to use the book, HERITAGE - CIVILIZATION AND THE JEWS, as required reading in all levels of education from the third grade through college. Abba Eban, the sophisticated Israeli Minister of Education, questioned about this program, reluctantly admitted that it was being used to gain American support for the Israeli's expansionist policies. As is to be expected, the Fundamental and Evangelical Christian community is swallowing this "hook, line, and sinker!"

There is some speculation that the B-1 bomber which crashed recently near Omaha, Nebraska, may have been shot down by a hand-fired, SA-7 Grail anti-aircraft missile. The tail section of such a missile was found in the bomber wreckage, and witnesses state that they saw a man running from near the crash site, carrying what they thought was a long pipe.
