DECEMBER 1983 NEWSLETTER

THE FOLLOWING INFORMATION COMES TO US FROM THE MEXICAN-TEXAS BORDER:

The Gestapo tactics of the IRS (we might add KGB too), have forced a lot of honest folks to go underground with their economy. We hear a lot about "Don't pay your income taxes, because they are un-Constitutional." Well, be that as it may, the Feds will harass you if you don't and it won't help to have many of our finest patriots in jail, when we are going to need them on the battlefield. You can't do very much on the inside, looking out, and although I admire those folks who have "guts" enough to "buck the system," I'm not always sure they are taking the right step.

There are those who criticize our folks for going to the Feds to get a Firearms license, but I believe it's worth it and that we as Christian Patriots should stay within the law wherever possible. I found out that if you want to beat the bureaucrat at his own game, then bury him in the ground he likes best, his own rules and regulations. Then when they criticize you, poke his regulations under his nose and let him be embarrassed. Since we have been forced to "play by the rules" of the "insiders," then we need to know those rules, and a lot of our people are terribly ignorant when it comes to this. We know that their rules do not come from the same source as ours. We go by what the Bible says is right and believe in honesty and good judgment, while theirs are based on greed. Greed has no common sense attached to it, so their rules will never be fair. But "beat them at their own game."

My personal opinion is that those folks who have been "conned" into saving up gold and silver, will soon be trying desperately to trade it off for a can of beans. As the Bible says, they will "throw their gold and silver in the streets in that day and it will not save them." When the time comes, the knowledge of how to make things with our hands will be a thousand times more important than knowing how to operate a computer. That "hammer and saw," may literally be worth its weight in the gold they are now saving up.

Unfortunately, we have those in the Identity movement who are preying on the minds of our people. This becomes increasingly easier, as the situation gets worse and worse.

"The Mexican situation is getting worse and worse by the day. We have to garage our vehicles at night, since if they can't steal them, they will slash the tires or break out the glass. If you refuse them food and water and look in the least bit infirm, they will beat you up and set fire to your house. If you are stupid enough to give them a ride, they will hit you over the head and take your vehicle and head out for Chicago or elsewhere. I now have a steel, barred door on the kitchen. It is made so we can open it for ventilation, without having someone pop through. It is not locked, but bolted through a solid stone wall. We sleep with a German Shepherd in the house at night. They tried to kill her last week, so I am putting added security on the other doors and windows, so they can't break them out and enter.

Luke 11:21 - "When a strong man armed keepeth his palace, his goods are in peace."

"Remember, that if a time of insurrection comes, ALL radios will be banned for the public and 99% of the sheep will obey this ban. You will stand out like a sore thumb if you use one then. I'd suggest a second, "back up" radio. Select a good handgun and rifle. Hide them and report them stolen. This will get them off the records as being in your possession. Many do not realize that the new ammunition for rifles and pistols now contains a desiccant that will cause the powder to deteriorate in about two years. They also contain "identifiers" which are minute particles, which can identify the lot number, date and time of manufacture, plus the manufacturer. At the present time, hand-loading powders do not contain the "desiccant" but do have the "identifiers." I would also suggest that if you have a generator, you run it a few minutes every week; otherwise, speaking from past experience, it probably won't run when you need it.

"We are prepared to move out at a moment's notice and have fixed the truck so that it will have about a 1200-mile cruising radius on one tank of fuel."

FROM ANOTHER SOURCE:

"I was over in Ojinga, Mexico, the other day and saw a funny bunch of Mexicans. About eight of them were wearing funny green-colored suits that had a red star for a shoulder patch. Their Espanol was absolutely terrible. It was the first Spanish I've ever heard with a Russian accent. They kept saying something about 'nyet, nyet!'

"Guess its time for us to leave this place. I can't pass as a Mexican because I'm too big. Mexico's got more "hot heads" than all the rest of the world combined. You insult one and you better kill him like you would a rattlesnake, because if you don't, he'll find some way to "do you in." So we're going to "split," before some "mozo" wakes me up in the morning, pointing a rusty Springfield at me and saying: 'Grino, go home.'

"There isn't much left here anyway and there never was very much across the river. There are a lot of medical supplies being sent into the North Texas area for some reason or another and the "wets" are coming across the border, almost unhindered. There's plenty of booze flowing, as the Russians and Mexicans must have it to be able to live with their politics."

It may be of interest to note that the man who wrote this information has suddenly disappeared and no one knows what has happened to him. Maybe his fears were justified!

The sad thing is that many of our good folks don't seem to realize that what he speaks about on the Mexican Border could soon be happening in Houston, Dallas, New Orleans, St. Louis, Chicago, Los Angeles, and around the rest of the country. Yet our stupid preachers are still telling their flocks: "Don't worry. The Lord is coming back soon to rescue you from this mess you have made." What will they tell their flocks as they are led away to the "slaughter pens" they will have been responsible for? I'd rather be prepared and then have the Lord come back, than to not be prepared and find He's not ready to rescue us yet. We are going to have an awful lot of disturbed Christians in America soon. We haven't seen anything yet. What I'm afraid of is that when the "chips are all down" some of them will be so discouraged that they will tell the bosses in Washington: "You better make a deal with them (Commies), because we don't have a chance." When and if that ever happens then we will be slaves and we will see the slaughter predicted by Gus Hall over fifty years ago when he said: "I'll live to see the day when 60-million hopelessly-diseased, capitalist animals will be hauled away to the elimination centers by the commissars."

If you haven't read the new novel SPIKE by Arnaud de Borchgrave and Robert Moss, it would be worth your time and money to do so. While the authors are sympathetic to the Zionist cause, they are right on the money when it comes to their evaluation of Communist infiltration of our government. It will cause you to stay awake at nights and may be of help to point out how serious our situation really is.

But, "When these things begin to come to pass, then look up, and lift up your heads; for YOUR REDEMPTION DRAWETH NIGH." (Luke 21:28)
